The M-8: More than a lighter

Sicherheitsflamme ✓

Durch die bewährte **Fix Flame Technologie** wird die Flammenhöhe im Produktionsprozess fest eingestellt. Eine hohe Flammenbildung während der Nutzung wird dadurch verhindert und die Sicherheit erhöht.

Safety Flame ✓

Due to the reliable **Fix Flame technology**, the flame height is automatically adjusted in the production process. This prevents the lighter to produce a high flame during use and increases safety to the consumer.

Hitzebeständig ✓

Durch den Hightech-Kunststoff **Acrylnitril-Styrol [AS]** und die moderne Konstruktion wird die im internationalen Sicherheitsstandard **ISO 9994** geforderte Temperaturbeständigkeit von 65 °C bei Weitem übertroffen.

Heat resistance ✓

Due to the high-tech **Styrene Acrylonitrile [AS]** material and the advanced design, the new **M-8** surpasses the requirements of the international safety standard **ISO 9994** in regards to the required 65 °C temperature resistance.

Stoßfest ✓

Die Sicherheit des Feuerzeuges wird durch den aus **AS** gefertigten stoßfesten Boden [**Shock-Proof-Bottom**] erhöht.

Impact resistance ✓

The **Shock-Proof Bottom** protects the lighter body when dropping by absorbing shocks on the suspension bottom plate, made of **AS**.
